October 1987 Revised January 1999

CD4511BC BCD-to-7 Segment Latch/Decoder/Driver

General Description

The CD4511BC BCD-to-seven segment latch/decoder/ driver is constructed with complementary MOS (CMOS) enhancement mode devices and NPN bipolar output drivers in a single monolithic structure. The circuit provides the functions of a 4-bit storage latch, an 8421 BCD-to-seven segment decoder, and an output drive capability. Lamp test (LT), blanking (BI), and latch enable (LE) inputs are used to test the display, to turn-off or pulse modulate the brightness of the display, and to store a BCD code, respectively. It can be used with seven-segment light emitting diodes (LED), incandescent, fluorescent, gas discharge, or liquid crystal readouts either directly or indirectly.

Applications include instrument (e.g., counter, DVM, etc.) display driver, computer/calculator display driver, cockpit display driver, and various clock, watch, and timer uses.

Features

- Low logic circuit power dissipation
- High current sourcing outputs (up to 25 mA)
- Latch storage of code
- Blanking input
- Lamp test provision
- Readout blanking on all illegal input combinations
- Lamp intensity modulation capability
- Time share (multiplexing) facility
- Equivalent to Motorola MC14511

Ordering Code:

| Order Number | nber Package Number Package Description | | | | | |
|--------------|---|--|--|--|--|--|
| CD4511BCWM | M16B | 16-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-013, 0.300" Wide | | | | |
| CD4511BCN | N16E | 16-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300" Wide | | | | |

Devices also available in Tape and Reel. Specify by appending suffix letter "X" to the ordering code.

Note 2: AC Parameters are guaranteed by DC correlated testing.

Typical Applications Light Emitting Diode (LED) Readout COMMON ANODE LED COMMON Cathode Led Gas Discharge Readout Liquid Crystal (LC) Readout APPROPRIATE VOLTAGE EXCITATION (SQUARE WAVE, VSS TO VDD) voo MM74C86 Direct DC drive of LC's not recommended for life of LC readouts. Incandescent Readout Fluorescent Readout DIRECT (LOW BRIGHTNESS) vss **A filament pre-warm resistor is recommended to reduce filament thermal shock and increase the effective cold resistance of the filament.

Physical Dimensions inches (millimeters) unless otherwise noted (Continued)

16-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300" Wide Package Number N16E

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

- 1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
